ALCiE Software Release Announcement

ALCiE Integrated Solutions Inc. ("AIS"), the developer of ALCiE® business solutions software, announces that it will bring to market, in the coming months, upgraded releases of its premium ALCiE Enterprise Edition, its first-class ALCiE Small-to-Medium Enterprise ("ALCiE SME") Edition, and its free ALCiE Complimentary Edition ("ALCiE CE").

* * *

ALCiE CE, which consists of the core Accounting applications (General Ledger, Accounts Receivable and Accounts Payable), will include additional Company and Financial templates, making the initial set up even more easily and quickly accomplished than before. ALCiE CE will also include the option to perform multiple processing steps automatically, with a click of a button, from key screens – making it faster and simpler to issue customer invoices, record cash receipts and make payments.

ALCiE SME and Enterprise Editions, which offer Financial, Distribution, Project Management and Manufacturing solutions, will have several new features and enhancements, including additional tracking and auditing functions, more user preferences, enhanced on-line help, and new inquiry and drilldown screens – to name just a few additions.

One of the strengths of ALCiE is that any additions that are initially made to one product will be shared with the other product lines. This is done for two primary reasons: first, AIS recognizes that functionality and features required by smaller enterprises are not very different from those required by larger enterprises; second, AIS is intent on maintaining product consistency, making the transition from one product line to the next as seamless as possible for customers who upgrade their ALCiE system to the next level. This approach promotes system scalability.

In addition to scalability, all ALCiE products will continue to live up to their reputation for reliability and durability, thanks to quality development and to the use of 100% Oracle technology.

For additional information, please contact ALCiE Integrated Solutions by telephone at 1-888-252-4350 or 1-514-744-3440, or by email at info@alcie.com.

About ALCiE Integrated Solutions

ALCiE Integrated Solutions Inc. ("AIS") is the owner and developer of the unified family of ALCiE® business applications software. AIS also develops other application software, primarily on Oracle®-based technologies. In addition, AIS provides professional I.T. services, and calls upon reputed vendor partners for complementary services, to fully address the needs of its customers with respect to business solution implementations. ALCiE modules are fully-integrated and can be bridged into existing legacy systems, taking advantage of a company's prior IT investments while optimizing its business data processes. AIS's mission is to create and implement reliable, easy-to-use and cost-effective solutions to meet the business requirements of small and medium-sized enterprises. ALCiE applications, built on a robust and dependable Oracle database architecture, seamlessly ensure reliable, rapid access to accounting and operational information required by personnel to successfully accomplish their tasks. Additional information on ALCiE solutions is available at www.alcie.com.
