ALCiE Complimentary Edition:
ALCiE's Free Financial Software
For Partners and Resellers

PRESS RELEASE - FOR IMMEDIATE RELEASE

Contact: Frank Zanfino
           ALCIE Integrated Solutions Inc.
           +1.514.744.3440

Montréal, Canada.   /   July 1, 2006.

ALCiE Integrated Solutions, Inc. ("AIS"), the developer of ALCiE® business solutions software, today announced the official launch of **ALCiE Complimentary Edition**™, its *free* entry-level financial software, which is being offered for re-distribution by qualified Partners and Resellers of ALCiE.

AIS is confident that its breakthrough initiative will hit the mark in both the business and I.T. communities, since it is aimed at attracting Business Solutions experts, Professional I.T. Consultants and Systems Integrators who are seeking to enhance their portfolio and gain an advantage when proposing their services to customers.

ALCiE **C**omplimentary **E**dition (**ALCiE CE**™) is a full-featured and fully-functional set of financial applications – specifically, Accounts Payable, Accounts Receivable and General Ledger – derived from **ALCiE SME Edition**™, the ERP/Accounting software designed for Small to Medium-sized Enterprises.

Given its roots, **ALCiE CE** ("**ACE**") is ideal as entry-level software that companies can use as they expand their successful businesses, while having the peace of mind that they can seamlessly and cost-effectively upgrade to the higher-level **ALCiE SME Edition** and **ALCiE Enterprise Edition**™ offerings at any time.

Scalability is a non-issue with the family of ALCiE business applications, which all run on the robust and dependable **ORACLE** database (version 8i or higher).

What's more, the free **ALCiE CE** applications paired with ORACLE Express Edition ("XE"), Oracle Corporation's free database, is the lowest cost business solution ever offered by AIS.

Altogether, **ALCiE CE**, ORACLE XE and trusted Business and Professional I.T. experts create a uniquely meaningful value proposition for customers that are currently in the market for ERP/Accounting software.
