ALCiE Enhances Enterprise Edition **6i** With Document And Graphic File Management Functionality

Montréal, Canada. / February 7, 2005

ALCiE® Integrated Solutions, Inc. (AIS), a leading producer of enterprise software, integrated business solutions, and professional services, today announced major document management, content management, and file sharing enhancements to its ALCiE Enterprise Edition **6i**™.

An integrated ALCiE® technology

Quick to implement and easy to use, ALCiE Enterprise **6i** has a modular structure that can easily scale to an organization's current or future needs, providing a host of applications including financial accounting, inventory management, and project management. With its recognized partners, ALCiE solutions allow for business process workflow, asset management, collaboration, and total back-end integration.

DocNET for ALCiE Enterprise **6i**™, the latest feature within ALCiE Enterprise Edition **6i**, offers companies a comprehensive solution for managing content, promoting collaboration, and automating all types of business processes, which traditionally have only been possible for large enterprises. DocNET for ALCiE Enterprise **6i**, provides functionality that facilitates the tracking, sharing, and accounting of documents, graphics, payments, and sound, enabling all types of organizations, regardless of size and industry, to save time and reduce administrative overhead.

"The Mid-sized organizations that speak to us face the same document sharing and content management needs as Fortune 500 businesses have, only they are restrained by limited budgets and IT resources," said Anthony Paraskevas, Vice-President of Marketing and Business Development at ALCiE Integrated Solutions. "The mid-market is ready for an Enterprise product with this type of sophisticated functionality while remaining easy to learn and to use. DocNET for ALCiE Enterprise **6i** can increase efficiencies throughout the enterprise and at a very affordable price".

"This document sharing technology will be rolled out across the company's newly released flagship enterprise software ALCiE Enterprise **6i**™," said Frank Zanfino, President of ALCiE Integrated Solutions. "DocNET for ALCiE Enterprise **6i** Enterprise Document Management and content sharing processes account for a major enhancement to our ERP solution. CEOs, managers and other users across the entire organization can count on having immediate and accurate data at their fingertips, with fewer requirements to verify information off-line; therefore lessening errors, and thus saving time. Organizations will be able to inquire on all types of documents and intellectual assets, conveniently stored in a secure database."

DocNET for ALCiE Enterprise **6i** is an Oracle-based document management module designed for businesses which need to manage a large volume of paper and electronic documents, as well as attaching those same documents to financial-accounting transactions, or project-based tasks.

DocNET for ALCiE Enterprise **6i** has incorporated features that enable rapid addition and management of documents in various formats for users of ALCiE Enterprise **6i** that will include:

➢ **Graphic files** (jpeg , gif , bmp , etc.) *… and*

➢ **ASCII files** (txt format)

• DocNET for ALCiE Enterprise **6i** will also allow for the easy addition of these documents in their native formats to the Oracle database. Features like parameterized queries ensure that you can locate the documents you need with just a few clicks from within any screen of ALCiE Enterprise Edition **6i**.

• DocNET for ALCiE Enterprise **6i** functionality is transparent and a key part of ALCiE's current enterprise product line. This economical yet powerful document sharing management tool is ideal for your growing organization's document management needs.

• DocNET for ALCiE Enterprise **6i** offers an easy document management upgrade path. As your document management requirements grow, DocNET for ALCiE Enterprise **6i** allows for easily customizable and extendable capabilities within the ALCiE Enterprise **6i** environment.

Features

DocNET for ALCiE **6i**™ is a feature-packed document management system built for the ERP mid-market. No mid-market ERP solution in its category offers such a powerful document management system with easy to use features. Here is a short list :

➢ Store electronic as well as digitized paper documents (*via scanners*)
➢ Quickly recognize document versions from thumbnail graphic screen shots
➢ Work with double-sided, even multi-page documents
➢ Ability to copy and paste scanned files and documents into the ALCiE Enterprise **6i** environment.
➢ Save scanned documents as TIFF, PNG, JPEG or BMP files.
➢ Search for documents matching given conditions and add them to DocNET for ALCiE Enterprise **6i**
➢ Print documents - fit large documents to a single page or split them across many pages
➢ E-mail documents.
➢ Import and Export documents along with indexing data.
➢ Web Browser based interface in addition to the desktop interface allowing you to query and work with ORACLE Databases and makes DocNET for ALCiE Enterprise **6i** accessible over the *Intranet* as well as over the *Internet*, thus allowing for the elimination of installing DocNET for ALCiE Enterprise **6i** at the client end.

Future releases of DocNET for ALCiE Enterprise 6i :

Current testing is taking place with ALCiE's DocNET technology regarding the following file attachments and capabilities to be fully supported within a future release of DocNET for ALCiE Enterprise Edition 6i :

➢ **WORD** (doc format) and **Excel documents** (xls format)

➢ **Acrobat documents** (pdf format)

➢ **Sounds** and **Sound Annotations**
(including the following formats: **.**mp3 , **.**wav , **.**aif , **.**AIFF, and MPEG-Audio)

➢ **Document Versioning:** A versioning feature to create and retain multiple versions of the same document will allow true collaboration without operational confusion. You can easily access the correct version of a document, or an older version of a document at any time. Create an unlimited number of versions of each document or promote an older version of a document to a new version. *(To be made available in Alcie Enterprise Edition 6i only)*

➢ **Event Logging:** Use the event logging/auditing feature to log details about user actions. For example you can configure this feature so that whenever a document is deleted, details about the action are logged. You can also log details about changes made to records, data fields etc.
(To be made available in Alcie Enterprise Edition 6i only)

➤ **Bar-Tool :** ALCiE's newest input feature dramatically improves the productivity of your data and document sharing and archiving process. It provides fully integrated encoding capabilities to scan, store and retrieve documents across all suites of ALCiE Enterprise Edition 6i. By eliminating manual indexing, Bar-Tool allows you to create a faster, more accurate document handling and document sharing process. Bar-Tool ensures data integrity and organizational efficiency, and with our third-party software interfaces, Bar-Tool easily extracts information from other applications to populate your forms and documents. Bar-Tool gives you the ability to quickly and efficiently process large numbers of varied documents easily and accurately.
(To be made available in Alcie Enterprise Edition 6i only)

About ALCiE Enterprise Edition 6*i*

ALCiE Enterprise Edition **6***i* is the latest web-enabled release of ALCiE Integrated Solution's flagship enterprise software. Running on ORACLE® Database, ALCiE Enterprise Edition **6***i* is a comprehensive enterprise solution for the mid-market. ALCiE Enterprise Edition **6***i* features a wealth of new modules, major functional enhancements and numerous ease-of-use features targeted towards mid to large size companies seeking to gain greater return for their IT investments. ALCiE Enterprise Edition **6***i* enables manufacturers, distributors, and business offices to maximize operational efficiencies within their companies. ALCiE Enterprise Edition **6***i* is a scalable, easy-to-modify, and robust application. ALCiE Enterprise Edition **6***i* can run on various releases of Oracle 8i, 9i or 10g databases and takes advantage of Oracle technology, which allows ALCiE Enterprise Edition **6***i* to be deployed in both web-enabled and/or client server environments. Using Oracle's web delivery technology "Oracle Internet Application Server", ALCiE Enterprise Edition **6***i* can be deployed over the web or local intranet in a Web-browser. ALCiE Enterprise Edition **6***i* can also be deployed in a conventional Client/Server environment for organizations not requiring web technology. In fact, a combination of both Web-browser and Client/Server deployment methods, using the same set of applications, is possible using ALCiE's multi-configuration methodology. This means your organization has complete flexibility in deploying ALCiE solutions over multi-tier configurations.

About ALCiE Integrated Solutions

ALCiE Integrated Solutions, Inc. provides a unified family of ALCIE® enterprise data management software suites, analytics, automated reports, and related business and data solutions with hundreds of system installations in the U.S., Canada and the Caribbean. The ALCIE modules are an integrated software solution based on ORACLE technology, and are quickly bridged into existing legacy systems taking advantage of a company's IT investment and optimizing its business data process cycle. The company's singular focus is creating and implementing fast, reliable, easy-to-use, and cost-effective solutions to meet the business data requirements of small, medium and large enterprises. The company's software products seamlessly ensure the reliable, rapid access of data files, and business-critical reports, all on a bullet-proof and reliable database architecture.
