

ALCiE Announces Major Functional Technology Upgrades With ALCiE Enterprise Edition 6i6

PRESS RELEASE - FOR IMMEDIATE RELEASE

Montréal, Canada. / December 14, 2005.

ALCiE® Integrated Solutions, Inc. (AIS), a leading producer of enterprise software, integrated business solutions, and professional services, today announced another major technological release in the form of an upgrade of the company's flagship enterprise software. **ALCiE Enterprise Edition™ 6i6**, is now being offered for commercial sale and global distribution.

Running on an ORACLE® Database, **ALCiE Enterprise Edition™ 6i6** is the most comprehensive, configurable, and customizable enterprise solution offering that ALCiE has ever produced.

ALCiE Enterprise Edition™ 6i6 features a wealth of modules, major functional enhancements and numerous ease-of-use features that are targeted towards mid to large size companies seeking to gain greater return for their IT investments. **ALCiE Enterprise Edition™ 6i6** enables manufacturers, distributors, and business offices to maximize operational efficiencies within their companies and allows for scalable, easy-to-modify, and robust applications on which to grow their business.

ALCiE Enterprise Edition™ 6i6 is based on the mature ALCiE 6i product line. ALCiE 6i6 can be deployed in both web-enabled and/or client server environments. Using Oracle's web delivery technology "Oracle Internet Application Server", **ALCiE Enterprise Edition™ 6i6** can be deployed over the web or local intranet through a Web-browser.

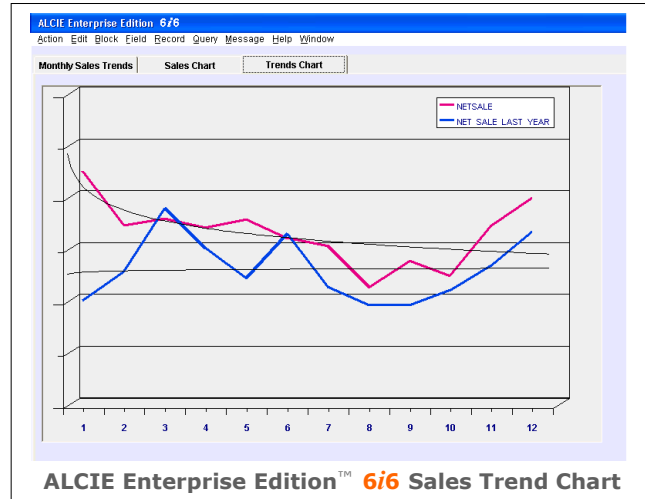

Furthermore, **ALCiE Enterprise Edition™ 6i6** is flexible in its deployment options. **ALCiE Enterprise Edition™ 6i6** allows for use within a conventional Client/Server environment for organizations not requiring web technology, as well as a combination of both Web-browser and Client/Server deployment methods, based on ALCiE's multi-configuration methodology. In fact **ALCiE Enterprise Edition™ 6i6** has been successfully tested in various Linux operating systems by accessing it on a web browser. This means your organization has complete flexibility in deploying ALCiE solutions over multi-tier configurations, and over several operating environments.

New Expanded Features Introduced In ALCiE Enterprise Edition™ 6i6

- **ALCiEAviator™** Application Desktop: This is our newest development in *advanced functional menu schemes* designed as an enhanced productivity tool for *all* users (from clerical to executive) and can be configured to fit specific roles and functions that reflect their daily priorities.
- Grid Data Interface for increased data visibility, user-friendly navigation, increased productivity, and enhanced inquiry capabilities.
- ALCiE's Tabular Screen design has been expanded to enhance all suites and modules throughout **ALCiE Enterprise Edition™ 6i6**.
- **ALCiEAnalytics™** has been redesigned as an out of the box and fully integrated sales analysis tool with built-in graphical and tabular displays. **ALCiEAnalytics™** is a powerful analysis tool in reviewing client buying behavior over time and in evaluating enterprise performance.

➤ **ALCiEAnalytics™** includes the following basic yet powerful analytical features :

- *Client Rankings;*
- *Period Comparisons;*
- *Extensive graphic and cumulative charts interpretations for quick identification of operational and client patterns affecting your business;*
- *What clients buy, how clients buy, and in the future will receive feedback of sales and promotional activities;*
- *On-line, real-time data for Top Sales, Sales Trends, Key Performance Indicators, and Operational Score Cards;*
- *Analytical Reporting capabilities;*
- *Track the best clients and their needs in order to retain the best accounts;*
- *Basic segmentation of customers based upon buying behavior;*
- *Sales Score-Cards;*
- *Inventory Score-Cards.*

- **ALCiESearch™**, a feature first introduced in **ALCiE Enterprise Edition™ 6i2**, has been expanded to include search capabilities across many **6i6** suites and modules.
- **ALCiEMessaging™** is an integrated collaboration utility that enables ALCiE users to exchange information securely, reliably and quickly. This is made possible because the information resides in, and is accessed through, the database.
- **ALCiEFORTRESS™** allows for even more internet security shielding capabilities, tightly managing a user's access to selected areas of ALCiE and protecting sensitive data across the entire enterprise. Moreover, this security feature can be applied to other Oracle-based applications. **ALCiEFORTRESS™** can also be effectively used as an integral part of a corporate adoption for SarbOx compliance.
- ALCiE's expanded control over approvals and authorization tracking makes **ALCiE Enterprise Edition™ 6i6** one of the most auditable business solutions in its market and a solid investment towards any corporate compliance program.
- Approval tracking capabilities within the purchase order module have been expanded to allow for authorization systems reflecting both flat organizations as well as larger approval cycles found in mid-sized and multi-national organizations.
- **Oracle Technology: ALCiE Enterprise Edition™ 6i6** continues to take advantage of the most recent Oracle technology in its database offering (10g), which collectively offer the most compelling reason to use ALCiE solutions. With Oracle technology and ALCiE ingenuity, our clients can securely deliver data to personnel anywhere in the world in a cost effective manner. **Scalability, stability, and reliability** are the three distinct advantages of Oracle technology that ALCiE takes advantage of in its solution suites.

ORACLE®

About ALCiE Integrated Solutions

ALCiE Integrated Solutions provides a unified family of ALCiE® enterprise data management software suites, analytics, automated reports, and related business and data solutions. The well-known ALCiE modules are an integrated software solution based on ORACLE® technology, and are quickly bridged into existing legacy systems taking advantage of a company's IT investment and optimizing its business data process cycle. The company's singular focus is creating and implementing fast, reliable, easy-to-use, and cost-effective solutions to meet the business data requirements of small, medium and large enterprises. The company's software products seamlessly ensure the reliable, rapid access of data files, and business-critical reports, all on a bullet-proof and reliable database architecture.
