ALCiE Accounts Payable Software Interfaces with Oracle E-Business

ALCiE Integrated Solutions Inc. (AIS), a provider of ERP Software and Business Solutions, announces the development of application interfaces between ALCiE Accounts Payable and Oracle E-Business Suite (EBS).

* * *

Ongoing efforts on the part of AIS are to provide bridged solutions that customers of Oracle EBS can use to supplement their information systems. In this regard, ALCiE Accounts Payable now includes application interfaces to Oracle EBS Payables and, with some re-configuration, to other external ERP Payables system.

These application interfaces (API) enable the porting of vendor invoice and/or payment information from Oracle EBS Payables into ALCiE Accounts Payable. Once the information is uploaded into ALCiE, Accounting personnel can track payables via inquiries and reports, forecast cash requirements, perform vendor analyses, view payment history, etc.

Combining Oracle and ALCiE applications provides customers with best-fit and low cost solutions.

More information on ALCiE software solutions and the Accounts Payable application interfaces can be obtained by contacting AIS or visiting the website www.alcie.com.

About ALCiE Integrated Solutions:
ALCiE Integrated Solutions ("AIS") is the owner and developer of the unified family of ALCiE business applications software. AIS's mission is to create and deliver best-fit, cost-effective and scalable solutions to meet the business requirements of small-to-mid-sized, growth-oriented enterprises. ALCiE business applications software distinguishes itself as an affordable, truly integrated and scalable option for a variety of industries and sectors. ALCiE applications are built on robust and dependable Oracle technology.
